Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3738

The Formal Drawings of September 8, 2000, have been approved by the Official Draftsperson.

In the Information Disclosure Statement of September 8, 2000, DE 4127550 has **not** been considered because there is no indication from US 6,235,057 B1 that the reference was made of record in the parent application serial no. 08/801,240.

The abstract of the disclosure is objected to because on line 20, "is" should read --in--. Correction is required (MPEP § 608.01(b)).

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees (*In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969)).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application (37 CFR 1.130(b)).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 18-31 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over the claims of U.S. Patent No. 6,235,057. Although the conflicting claims are not identical, they are not patentably distinct from each other because each of the features is clearly set forth in one or more claims of the patent.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3738

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

Claims 18-23, 25-27, and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuriwaka, JP 5-300917 A, which discloses all the elements of claim 18 except that the English abstract does not specify a *natural* tendon or ligament. However, such was common in the art and would have been an obvious variant on "artificial ligament, etc." (English abstract, line 1) in view of certain known advantages of natural grafts. The limitations of claim 19 would have

Art Unit: 3738

been obvious in order to secure the other end of the ligament with the fixation method taught by Kuriwaka.

Claims 18-23, 25-27, and 29 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Hublin, FR 2 704 140 A.

Claims 24, 28, 30, and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hublin, FR 2 704 140 A3, or Kuriwaka, JP 5-300917 A, in view of Roger et al., WO 92/03980. To round the upper part of the head of the Hublin screw or the Kuriwaka fixation screw device so as to create a hemispherical geometry would have been obvious from portion 8 in Figure 3 of Roger et al., with the ordinary practitioner having been motivated by the advantage taught by Roger et al. on page 1, lines 16-18 and 25-29.
